

10BASE-T1S Differential signal adaptor

Convert differential signals to single-ended for 10BASE-T1S, facilitating signal analysis with a logic analyzer.

Item number : AC059

Technical data

Power : Micro USB port, Vbus=5V

Unit : mm

Note:

- An Micro USB cable is needed but not included.
- Can be cascaded as multi cards.
- Does not support Fast AUX (FAUX).
